

Lost Prophecies about the End of America.

8/7/2022

First, Kindle this book! You will be excited to see so many prophecies about America is one place.

I have about half of these visionaries in my collection, but this book has so many more! (Sarah Menet is one of them!)

I love how some were given "language" that only the LDS would know, like "covenant people".

Here's two visions I just loved reading:

Hollie L. Moody

I turned and watched as the two groups of people converged on the nations of the world.

I watched as one group brought healings, restoration, hope, etc., to the people of the nations who loved the Lord. I watched as things that had been broken down were built back up by them. I saw as some of the people from the wilderness cast out nets into the oceans of the world, and when they drew the nets back to shore, had gathered the souls of the lost. This scene thrilled my heart.

I also observed as the other group of people, with their axes and/or weapons of warfare, fought against those who refused to submit to the authority of the Lord God. All that was against the Lord, was hewn down. These scenes filled me with dread.

“What is this all about, Lord?” I asked the Lord.

The Lord turned and answered me. “These are prophets of the Highest, messengers of My covenant,” He said to me. “I have prepared them, proved them and known them in their time in the wilderness. They go before Me to prepare the way for My return. And truly, child, My return is near; even at the doors.”

Wordlessly, I turned and once again began to watch the messengers of the covenant as they went forth into the world with their message from the Lord.

Another one:

Nita Johnson

Then the vision changed and I saw a huge brick oven – a sort of kiln – one that would be used for baking pottery in perhaps the early 1800's. In looking closer, instead of potter, I saw silver vessels being fired.

I asked the Lord what the silver vessels were. I then saw a man's arm reach in with a long shovel-like instrument to take the silver vessels out. The Lord replied, "These are they whom I am releasing at this time for front-line ministry."

I found myself strangely drawn back to again peer into the huge oven. I said, "Lord, what are those vessels way back in the back? Do you see them, Lord? I can just barely see them. They seem almost hidden back on a shelf in the back of the oven.

The Lord then replied, "Those are my golden vessels. I am keeping them hidden in the fiery furnace until the time of their appearing. Only silver vessels will be revealed at this time. The golden vessels will be released soon after their great fiery trial." The vision came to an end.

When I saw these prophets coming and saw the Church's fear, I couldn't help but ask Him, "Lord, why does the Church so fear these awesome men?" "They will bear the rod of government – a seemingly unbearable yoke to the Church." I saw and felt the power and unparalleled authority flowing out of these golden vessels. I felt the holy fear of God which emanated from them, and I instinctively knew that the apostle would bear a rod of government of even greater proportion. The Lord then concluded by saying, "The Church greatly fears their coming."
